ANNUAL INDEX Volume 9, 1972

January 1–48 *July 89–136*
April 49–88 *October 137–172*

SUBJECT INDEX

Bridges
Vibration and Deflection of Steel Bridges—*Wright and Walker* 20

Columns
Stiffness Coefficients of Beam-Columns with Non-Prismatic Members—*Stack-Staikidis and Eimer* 114
Direct Design of Columns Subjected to Combined Loading—*Phang and Calenza* 142
Effective Length of Columns with Intermediate Axial Load—*Sandhu* 154
Calculation of Effective Lengths and Effective Slenderness Ratios of Stepped Columns—*Anderson and Woodward* 157

Composite Design
Torsional Properties of Composite Girders—*Heins and Kuo* 79

Domes
Experimental Study of a Schwedler Rigid Framed Dome—*Beavers and Beaufait* 73

Fabrication
Investigation of Triangular Heats Applied to Mild Steel Plates—*Nicholls and Weerth* 137

Girders
The Case for the Semi-Box Girder—*Schlenker* 32
Torsional Properties of Composite Girders—*Heins and Kuo* 79
A Stub-Girder System for High-Rise Buildings—*Colaco* 89

Hyperbolic Paraboloids
Buckling of Hyperbolic Paraboloids—*Buchert* 70

Lateral Buckling
A Unified Approach to the Elastic Lateral Buckling of Beams—*Nethercot and Rockey* 96

Load Factor Design
Load Factor Design of Steel Buildings—*Galambos* 108

Multistory Buildings
Simplified High-Rise Drift Analysis and Optimized Adjustment—*Fleischer* 50
A Stub-Girder System for High-Rise Buildings—*Colaco* 89

Plastic Design
Tables for Plastic Design of Beams with Rectangular Holes—*Redwood* 2

Vibration
Vibration and Deflection of Steel Bridges—*Wright and Walker* 20

Web Openings
Tables for Plastic Design of Beams with Rectangular Holes—*Redwood* 2

AUTHOR INDEX

Anderson, John P. and Woodward, James H.
Calculation of Effective Lengths and Effective Slenderness Ratios of Stepped Columns 157
Beavers, James E. and Beaufait, Fred
Experimental Study of a Schwedler Rigid Framed Dome 73
Beaufait, Fred (See Beavers, James E.)
Buchert, Kenneth P.
Buckling of Hyperbolic Paraboloids 70
Calenza, Eugene (see Phang, Michael K. S.)
Colaco, Joseph P.
A Stub-Girder System for High-Rise Buildings 89
Eimer, N. (see Stack-Staikidis, W. J.)
Fleischer, Walter H.
Simplified High-Rise Drift Analysis and Optimized Adjustment 50
Galambos, T. V.
Load Factor Design of Steel Buildings 108
Heins, Conrad P., Jr. and Kuo, John T. C.
Torsional Properties of Composite Girders 79
Kuo, John T. C. (see Heins, Conrad P., Jr.)
Nethercot, D. A. and Rockey, K. C.
A Unified Approach to the Elastic Lateral Buckling of Beams 96
Nicholls, J. I. and Weerth, D. E.
Investigation of Triangular Heats Applied to Mild Steel Plates 137
Phang, Michael K. S. and Calenza, Eugene
Direct Design of Columns Subjected to Combined Loading 142
Redwood, R. G.
Tables for Plastic Design of Beams with Rectangular Holes 2
Rockey, K. C. (see Nethercot, D. A.)
Sandhu, Balbir S.
Effective Length of Columns with Intermediate Axial Load 154
Schlenker, Norman E.
The Case for the Semi-Box Girder 32
Stack-Staikidis, W. J. and Eimer, N.
Stiffness Coefficients of Beam-Columns with Non-Prismatic Members 114
Walker, William H. (see Wright, Richard N.)
Weerth, D. E. (see Nicholls, J. I.)
Woodward, James H. (see Anderson, John P.)
Wright, Richard N. and Walker, William H.
Vibration and Deflection of Steel Bridges 20
